PERMISSION TO TREAT BEES & RELEASE FROM LIABILITY

Permission is granted herewith to Pestgon Incorporated to treat the bee hive(s) located on the property listed below.

I understand that Pestgon will kill the bees but is not removing the hive(s). I also understand that if the hive(s) is/are located in the interior of a wall, ceiling, or other void, it will be necessary to have the remains (whether honey, wax or other organic material) removed in order to prevent this material from staining, leaking through, or from attracting other insects. I realize that Pestgon highly recommends extracting the hive(s) to avoid further damage to the building and that Pestgon is not performing this removal. I understand that it will be necessary for me to contract with Pestgon or another company if I decide to extract the hive(s) at a later date. Since I have elected to not extract the hive(s), Pestgon will have no further responsibility or liability with regard to the building or the remains.
